1. IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND SUPPLIER

Product name: Bulldock® 8 UL Insecticide

Other names: None

Product codes and pack sizes: 4952803 (200 L), 4952781 (1000 L)

Chemical group: Synthetic pyrethroid

Recommended use: Agricultural insecticide

Formulation: Ultra Low Volume liquid

Supplier: Bayer CropScience Pty Ltd ABN 87 000 226 022

Address: 391 - 393 Tooronga Road, East Hawthorn

Victoria 3123, Australia

Telephone: (03) 9248 6888

Facsimile: (03) 9248 6800

Website: www.bayercropscience.com.au

Contact: Development Manager (03) 9248 6888

Emergency Telephone Number: 1800 033 111 – Orica SH&E Shared Services

2. HAZARDS IDENTIFICATION

HAZARDOUS SUBSTANCE (see Risk phrases below) – NON DANGEROUS GOOD

Combustible liquid. Contact with skin or eyes may be painful. Dangerous to aquatic organisms and bees.

Risk phrases: R20 – Harmful by inhalation.
R38 – Irritating to skin.
R65 - Harmful: May cause lung damage if swallowed.

Safety phrases: See Sections 4, 5, 6, 7, 8, 10, 12, 13

ADG classification: Not a “Dangerous good” for transport by road or rail according to the Australian Code for the Transport of Dangerous Goods by Road and Rail.

SUSDP classification: Schedule 6 (Standard for the Uniform Scheduling of Drugs and Poisons)

4. FIRST AID MEASURES

If poisoning occurs, immediately contact a doctor or Poisons Information Centre (telephone 13 11 26), and follow the advice given. Remove person from contaminated area. Apply artificial respiration if not breathing. Show this Material Safety Data Sheet to the doctor.

Inhalation
If inhaled, remove to fresh air and keep at rest. Obtain medical advice if at all worried. If breathing stops or shows signs of failing, start artificial respiration.

Skin contact
Carefully remove contaminated clothing and footwear. Wash affected areas with soap and water. Apply Vitamin E cream, toilet milks or local anaesthetic creams to reduce pain. Seek medical advice if at all worried. Launder contaminated clothing before re-use.

Eye contact
Rinse eyes immediately with clean water for at least 15 minutes and obtain urgent medical aid.

Ingestion
Wash out mouth with water. DO NOT induce vomiting. Give a glass of water. Do not give anything by mouth if the patient is semi-conscious or unconscious. Keep patient at rest and seek medical advice as above.

First Aid Facilities
Ensure eyewash and safety shower facilities are available in the workplace.

Medical attention
Bulldock 8 UL contains less than 1% beta-cyfluthrin, which is a synthetic pyrethroid. The remainder is made up of mineral oil and other hydrocarbon solvents.

Symptoms of over-exposure
Local: Skin and eye paraesthesiae. Usually transient with resolution within 24 hours. Irritation of mucous membranes.
Systemic: Dizziness, drowsiness, headache, listlessness, nausea, anorexia and vomiting, epigastric pain, muscular fasciculation of limbs; also, pulmonary oedema, anaesthesia or other CNS effects; unconsciousness, convulsions, coma with very high doses/exposures.

Treatment
Local: Skin – apply Vitamin E cream or simple toilet milks.
Eyes - Instil local anaesthetic drops e.g. 1% amethocaine hydrochloride eye drops. Give analgesics as necessary.
Systemic: Monitor respiratory and cardiac functions. Observe electrocardiograph, and check for pulmonary oedema in event of inhalation.
Gastric lavage and charcoal administration. (Paraesthesiae of mouth, tongue, larynx and pharynx may be present.) As this product contains hydrocarbon solvents, care should be taken to prevent pulmonary aspiration. Small amounts of liquid aspirated into the respiratory system during ingestion or from vomiting may cause bronchopneumonia or pulmonary oedema. Endotracheal intubation, and artificial respiration, as necessary.
Anti-convulsant therapy with diazepam i.v.
No specific antidote.
Contraindications – adrenergic compounds, atropine. (Must not be confused with organophosphorous compounds.)
Recovery should be spontaneous.
5. FIRE FIGHTING MEASURES

Extinguishing media  Water spray, foam, dry agent, carbon dioxide or sand.

Hazards from combustion products  In a fire, formation of hydrogen chloride, hydrogen cyanide, hydrogen fluoride, carbon monoxide, carbon dioxide, aldehydes, ketones and nitrogen oxides can be expected.

Precautions for fire fighters  The product is a Class C1 Combustible liquid. Firefighters should wear full protective gear, including self-contained breathing apparatus (AS/NZS 1715/1716). Keep unnecessary people away. If it can be done safely, remove intact containers from the fire. Otherwise, use water spray to cool them. Avoid spraying directly into containers due to danger of boilover. Bund area with sand or earth to prevent contamination of drains or waterways. Dispose of fire control water or other extinguishing agent and spillage safely later. Do not release contaminated water into the environment.

Hazchem code  Not applicable

6. ACCIDENTAL RELEASE MEASURES

Avoid contact with the spilled material or contaminated surfaces. Extinguish or remove all possible sources of ignition. When dealing with spills do not eat, drink or smoke and wear protective clothing and equipment as described in Section 8 - PERSONAL PROTECTION. Keep people and animals away. Prevent spilled material from entering drains or watercourses. Contain spill and absorb with earth, sand, clay, or other absorbent material. Collect and store in properly labelled, sealed drums for safe disposal. Deal with all spills immediately. If contamination of drains, streams, watercourses, etc. is unavoidable, warn the local water authority.

7. HANDLING AND STORAGE

Handling  Keep out of reach of children. Will damage eyes and skin. Avoid inhaling vapour or spray mist. Avoid contact with eyes and skin. If product in eyes, wash it out immediately with water. If clothing becomes contaminated with product, remove clothing immediately. Wash area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, face shield and contaminated clothing.

Storage  Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight. Keep away from all ignition sources.

Flammability  Combustible liquid, Class C1 - flashpoint between 61°C and 150°C.
8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure standards

The NOHSC exposure limit for oil mist, refined mineral is:
TWA: 5 mg/m³

The manufacturer of the solvent recommends the following Occupational Exposure Limits:
Solvent naphtha (petroleum), heavy aromatic: TWA: 100 mg/m³ (17 ppm).
For the naphthalene present in the solvent the NOHSC Occupational Exposure Limits are:
TWA: 10 ppm (52 mg/m³), STEL: 15 ppm (79 mg/m³). Skin notation.

Definitions:

Exposure standard – Time Weighted Average (TWA) means the average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day working week.

Exposure standard – Short term exposure limit (STEL) means a 15 minute TWA exposure which should not be exceeded at any time during the working day.

Skin notation – Absorption through the skin may be a significant source of exposure.

Biological limit values

None allocated

Engineering controls

Control process conditions to avoid contact. Use adequate ventilation to keep airborne concentrations below the exposure limits. Use in a well-ventilated area only.

Personal Protective Equipment

It is important to protect eyes and skin.

• Wear face shield
• Wear cotton overalls buttoned to the neck and wrist and a washable hat.
• Wear elbow-length PVC or nitrile gloves.
• If working in a poorly ventilated area or if occupational exposure levels are likely to be exceeded, wear a respirator suitable for organic vapours - AS/NZS 1715/1716 approved.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Clear yellow liquid
Odour: Aromatic chemical
pH: Not applicable
Vapour pressure: Not available
Vapour density: Not available
Boiling point: Not available
Freezing/melting point: Not available
Solubility: Insoluble
Specific Gravity: 0.87 at 20°C
Flash Point: > 78°C (Pensky-Martens Closed Cup)

Flammability (explosive) limits: Not available
Auto-ignition temperature: Not available
Partition coefficient (octanol/water): Beta-cyfluthrin: \( K_{ow} \log P = 6.18 \) (22°C)
10. STABILITY AND REACTIVITY

**Chemical stability**  
Stable under normal conditions of use.

**Conditions to avoid**  
Avoid sources of ignition and extreme heat.

**Incompatible materials**  
Avoid oxidising agents and strong alkalis.

**Hazardous decomposition products**  
In a fire, formation of hydrogen chloride, hydrogen cyanide, hydrogen fluoride, carbon monoxide, carbon dioxide, aldehydes, ketones and nitrogen oxides can be expected.

**Hazardous reactions**  
None

11. TOXICOLOGICAL INFORMATION

**POTENTIAL HEALTH EFFECTS**

**Inhalation**  
Inhalation of product vapour may cause transient irritation of mucous membranes (nose, throat and respiratory tract), may cause headaches, dizziness, drowsiness, could be anaesthetic, and may have other central nervous system effects lasting up to 24 hours.

**Skin contact**  
Irritating. Contact with the skin, especially the face, may result in initial stinging, burning or tingling sensations (fingertips, nose), followed by numbness or pain which may persist up to 24 hours. Repeated exposure may cause skin dryness or cracking.

**Eye contact**  
May be very irritating to the eyes.

**Ingestion**  
Symptoms include burning sensations and numbness in the mouth and throat, headache, dizziness, drowsiness, nausea, vomiting, listlessness, stomach pain, muscular twitching of arms or legs, unconsciousness, convulsions, and coma (very high doses). Small amounts of liquid aspirated into the respiratory system during ingestion or from vomiting may cause bronchopneumonia or pulmonary oedema.

**ANIMAL TOXICITY DATA – PRODUCT**

**Acute:**

**Oral toxicity**  
LD<sub>50</sub> rat: > 2500 mg/kg

**Dermal toxicity**  
LD<sub>50</sub> rat: > 4000 mg/kg

**Inhalation toxicity**  
LC<sub>50</sub> rat: 1.272 mg/L (4 h) aerosol

**Skin irritation**  
Irritant (rabbit)

**Irritation of mucous membranes**  
Non irritant (rabbit)

**Sensitisation**  
Non-sensitising (guinea pig)
11. TOXICOLOGICAL INFORMATION - continued

**Chronic:**

Beta-cyfluthrin is not mutagenic, carcinogenic or teratogenic and did not cause reproductive effects in animal studies. There was no evidence of delayed neurotoxicity. This product contains naphthalene. The International Agency for Research on Cancer evaluated naphthalene and concluded that there was sufficient evidence for carcinogenicity in experimental animals, but inadequate evidence for cancer in exposed humans. Accordingly, IARC classified naphthalene as a possible human carcinogen (Group 2B).

12. ECOLOGICAL INFORMATION

Beta-cyfluthrin is very toxic to aquatic organisms. It is dangerous to bees. It has a low toxicity to birds, mammals and earthworms. DO NOT contaminate streams, rivers or waterways with Bulldock 8 UL or the used containers.

**Environmental fate, persistence and degradability, mobility**

The degradation of beta-cyfluthrin is rapid in different soils. Leaching behaviour can be classified as immobile. The bioconcentration factor (BCF) of beta-cyfluthrin is 506. It is readily biodegradable.

13. DISPOSAL CONSIDERATIONS

When returnable container is empty or contents no longer required return it to the point of purchase. For non-returnable containers, triple or (preferably) pressure rinse them before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt. Dispose of waste product through a reputable waste contractor.

16. OTHER INFORMATION

Trademark information
Buldock® is a Registered Trademark of Bayer.

Preparation information
Replaces August 1, 2002 MSDS.
Reasons for revision: Updated MSDS for solvent, 16 heading format, risk phrases, First Aid, Medical Advice, Exposure Standards.

This MSDS summarises our best knowledge of the health and safety hazard information of the product and how to safely handle and use the product in the workplace. Each user should read this MSDS and consider the information in the context of how the product will be handled and used in the workplace including in conjunction with other products.

If clarification or further information is needed to ensure that an appropriate risk assessment can be made, the user should contact this company.

Our responsibility for products sold is subject to our standard terms and conditions, a copy of which is sent to our customers and is also available on request.
