**Note to Physician**
There is no specific antidote.

**TREATMENT FOR FIPRONIL OVEREXPOSURE:**
In severe cases of overexposure by oral ingestion, lethargy, muscle tremors, and in extreme cases, possibly convulsions may occur. Recommendations for treatment are based on anticonvulsant therapy as routinely administered to humans. Phenobarbital or diazepam may be useful in controlling convulsions induced by Fipronil.

Even when symptoms of Fipronil intoxication are rapidly reversed by treatment, the treatment must be continued for several days, gradually decreasing the dose of anticonvulsant based on the patient's clinical response. This is necessary due to the slow elimination of the compound.

General and Disposal
Wear appropriate gear for the situation. See Personal Protection information in Section 8.

Non-hazardous waste. Place in a container for disposal. Dispose in accordance with all local, state/provincial and federal regulations.

Land Spill or Leaks
If spilled on the ground, the affected area should be scraped clean and placed in an appropriate container for disposal. Decontaminate tools and equipment following cleanup.

SECTION 7. HANDLING AND STORAGE

Handling Procedures
Keep out of the reach of children.

Avoid contact with skin, eyes and clothing. Do not take internally.

Storing Procedures
Do not contaminate water, food, or feed by storage or disposal. Store unused boxes out of reach of children and animals. Store away from heat or sunlight.

Work/Hygienic Procedures
Do not store, use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored.

Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco.

Remove and wash contaminated clothing before re-use. Then wash body thoroughly with soap and water and put on clean clothing.

Wash clothing with detergent and hot water before reusing. Contaminated clothing should not be taken home or laundered with other clothing.

Min/Max Storage Temperatures
Do not transport or store above 38 °C
SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls
Use general ventilation to minimize exposure.

Hand Protection
Chemical-resistant gloves made of waterproof material such as neoprene, butyl rubber, barrier laminate or nitrile rubber.

Body Protection
Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks

Consideration must be given both to durability as well as permeation resistance.

General Protection
These recommendations provide general guidance for handling this product. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and piping systems for maintenance and repairs. Waste resulting from these procedures should be handled in accordance with Section 13: Disposal Considerations.

Assistance with selection, use and maintenance of worker protection equipment is generally available from equipment manufacturers.
